EDUCATION

UNIVERSITY OF TEXAS AT DALLAS **Expected 2022**

Bachelor of Science (BS) in Computer Science; Minor in Business Intelligence Analytics

Academic Excellence Scholar
Industry Coordinator for Artificial Intelligence Society & Society of Asian Scientists and Engineers (SASE)
ACM 2020 Research Member – NLP Text Summarizer, ACM Student Mentor

COURSEWORK

Data Structures and Algorithms (Java)	Introduction to Machine Learning (Python)	Natural Language Processing - HLT
Database Systems (SQL)	Probability and Statistics in CS	Computer Architecture
C/C++ Programming in Unix	Computer Science II (C++)	Calculus I and II

Online- Cloud Hero: Data & ML (GCP Certified), TensorFlow Developer Certification (On Going)

SKILLS

Programming Languages /DB: • Java • Python • C++ • Dart • SQL • Firebase •Perl • Bash
Frameworks and Tools : • Flutter • Springboot • Pandas • Flask • Sci-kit • PyTorch • NLTK • Google Cloud • Apache Spark • Git • Keras

EXPERIENCE

SOFTWARE ENGINEERING INTERN – (ML ENGINEERING)

mFilterIt – ML Based Fraud Detection Startup *September 2020 - Present*

- Developed a feature engineering predictive model of user re-engagement & frequent patterns using Pandas & sci-kit learn
- Building a machine learning module for anomaly detection by implementing the Frequent Pattern Growth Algorithm
- Sped up process of data wrangling and feature extraction

UNDERGRADUATE RESEARCH ASSISTANT | DR. SRUTHI CHAPPIDI

UT Dallas – UT Southwestern *June 2020 – September2020*

- Developed Needleman-Wunsch Algorithm in Python to perform effective sequence alignment of RNA sequences with over 80 percent accuracy and stored data in MySQL database
- Engineered web framework layer of the application using the Python Flask Framework, HTML, JS, and Google Cloud.

MOBILE APP DEVELOPMENT INSTRUCTOR | DR. JEY VEERSAAMY

CSOR – Computer Science Outreach Center at UTD *June 2020 – August 2020*

- Drafted & Taught a course to enhance understanding of Dart programming language, Flutter framework & Architectural patterns to students on direct recommendation from the Director, CS Outreach Program, Dr. Jey Veerasamy.

PROJECTS

NLP TEXT SUMMARIZATION | ACM RESEARCH – FALL 2020 *Python, Py-Torch, Keras, Spacy*

- Analyzed different abstractive and extractive text summarization models (e.g. Ernie, Pegasus, Bert) to determine best use case for each model by calculating Flesch-Kinkaid readability and rouge scores of every summary generated by these models
- Based on results developed a Proof of concept for NLP model to improve the quality of the generated text-summaries by using hybrid abstractive and extractive model approach.

QUICKERRAND | DEFHACKS 2020 *Flutter, Firebase, Dart*

- Led a team of three to develop a Proof of Concept app allowing people in the neighborhood to post and accept gigs using the Flutter BLOC Architectural Pattern

F.A.C.E | EPICS *Java, React, MySQL Workbench, Figma*

- Spearheaded a 5-member team of computer science freshmen to design and develop an automated data handling & processing solution using principles of Object-Oriented Design & Java for our client, FACE.
- Reduced their operation time by 60 percent.

HONORS AND AWARDS

Aug 2019 - Erik Jonsson Academic Excellence Scholarship with Distinction
Mar 2018 - 2nd Place Utah-First Robotics Competition (Java/OpenCV)
Jun 2015 - 2017 - Scholar Blazer Recipient for Excellence in Academics & German

LEADERSHIP

Industry Coordinator – AIS, UTD
External Relations Chair – SASE
Student Mentor – ACM,UTD
